

# Women Helping Women

Women Helping Women

Our first Columbus County Republican Women meeting was a huge success. There is a lot of enthusiasm and willingness to make an impact on our county. We will have a presence. We will be seen in our red attire at meetings, festivals, fairs, county meetings, and other gatherings all around the county.

Our mission statement is:

*The mission of the Columbus County Republican Women Group is to positively impact our county, state, and nation, while strengthening the Columbus County Republican Party through recruiting, educating, training, supporting, and electing Republicans.*

Our initial focus will be with education and training. What better topic to start with than elections criteria, specifically the NC Photo ID Symposium on August 29th at the Dempsy Herring Building in Whiteville. For more information, visit <http://columbusco.org/Departments/Board-of-Elections>. Given all the issues with the 2018 elections, every single voter needs to be aware what to expect in the 2020 elections.

The Columbus County Republican Women will be partnering with programs throughout the county with the purpose of assisting those in need. We want to help organizations like Families First, the Humane Society, Senior Citizens Centers, Community CPR, Hospice House, to name a few. One way to do this is to advertise and ask for citizens to bring canned

goods, clothes,  
old furniture, whatever the need is at the time, to our  
meetings and  
gatherings.

The Columbus County Republican Women will also be recruiting  
female candidates to run for county positions.  
I don't think anyone will argue with the findings from experts  
that show  
women make better bosses. Plus, we are  
better listeners and learners. They had  
to be talking about Republican women. Women are known to be  
excellent  
multi-taskers. We are better problem  
solvers than most of the males in society and especially the  
political  
arena. Just take a look at Governor Roy  
Cooper's record.

It has been said that men argue that women make decisions  
using emotions and feelings. Case in  
point in favor of Republican Women. Go  
back to earlier this year during the sheriff race hearings.  
The two Republican Board of Elections  
member's decisions were based solely on evidence. It was  
crystal clear that the protester  
Gloria Smith and her lawyers failed to prove her case.  
However, the three Democrat Board of  
Elections members voted using their beliefs, opinions, and  
feelings. I made a  
statement during our meeting that what happened to our Sheriff  
Jody Greene  
should never ever be allowed to happen again.  
There is a major difference between Democratic and Republican  
beliefs.

We are sick and tired of the same old politics in Columbus  
County where a few people seem to run everything. We are done

with our voices not being heard. We have a lot to say and we are going to speak out with dignity, poise, and grace. We have a lot to do and we will do it with knowledge, unity, and determination.

We need you. Columbus County needs you.
